All-in-one Bluetooth BLE5.4 Capacitive Fuel Level Sensor with Radar

Built-in Bluetooth and replaceable battery, which can work maximum 5~6 years. Configurable ibeacon broadcasting supports all types of Bluetooth M2M devices including Teltonika GPS tracker.

Embedded Millimeter Wave Radar will help detect human beings to prevent fuel theft.

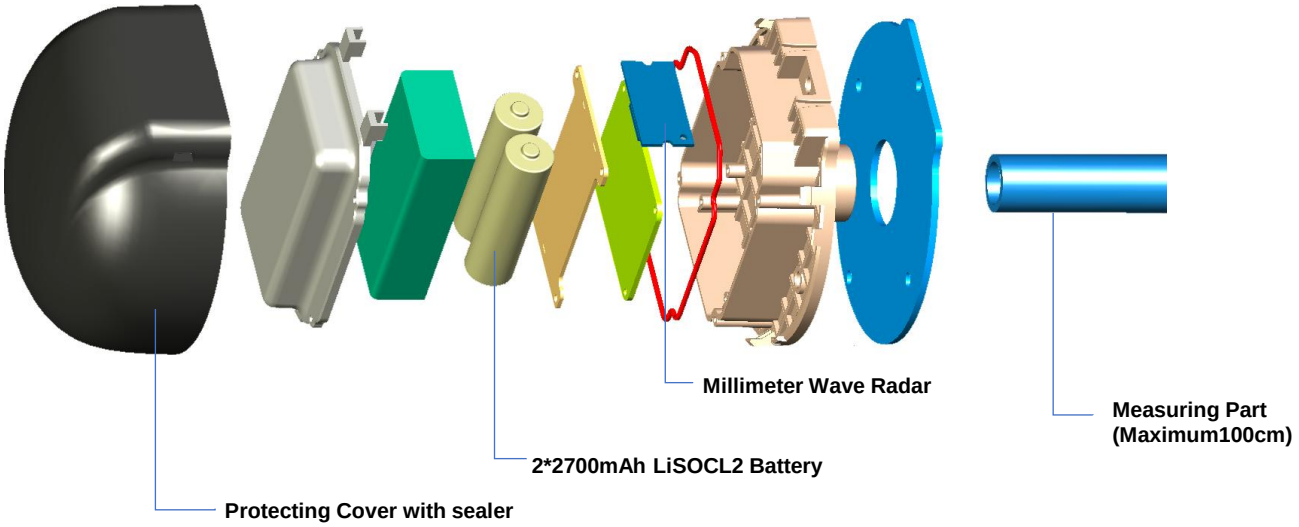

Model: CPM212

Key Highlights

- Bluetooth BLE iBeacon Broadcasting, maximum 50m range
- Built-in battery and low power consumption design support maximum 6 years
- Built-in Millimeter Wave Radar to detects human beings in 1~3m to prevent theft alarm
- Built-in Temperature Sensor, Tilt Sensor for algorithm correction
- Easy configuration tank volume via mobile APP
- Compatible with all types of Non-conductive liquid: Gasoline, Diesel, etc.
- High resolution:0.1mm
- High Accuracy: ≥99.5%

All-in-one Bluetooth BLE5.4 Capacitive Fuel Level Sensor with Radar

How to prevent human being from stealing ?

Built-in Millimeter Wave Radar will help detect human from 0.2~3meters distance, and sensor will be broadcast an alarm via iBeacon to trigger any third party 4G unit.
